

AMAR CHIPPAWAR

DEVOPS ENGINEER | NETWORK & CYBERSECURITY ANALYST

Chandrapur, Maharashtra, India - 441222 | +91 9405157316 | amarchippawar101@gmail.com

Portfolio: devops-portfolio-nextjs-umber.vercel.app

SUMMARY

Detail-oriented DevOps Engineer with a strong foundation in Networking and Cybersecurity. Hands-on experience in containerization (Docker, Kubernetes), CI/CD automation (Jenkins), Infrastructure as Code (Terraform, Ansible), and AWS cloud infrastructure, combined with practical knowledge of TCP/IP networking, routing, switching, and network security. Skilled at identifying vulnerabilities, securing systems, and automating reliable deployment pipelines. Quick learner, adaptable, and committed to continuously building technical expertise across DevOps and security domains.

TECHNICAL SKILLS

- DevOps & Cloud: Linux, Docker, Docker Compose, Kubernetes, Jenkins, AWS (EC2, S3, IAM, VPC), Terraform, Ansible, CI/CD, Git, GitHub, Shell Scripting, YAML, JSON
- DevSecOps: SonarQube (code quality), Trivy (container vulnerability scanning)
- Networking & Security: TCP/IP, IP Addressing, Subnetting, Static Routing, Inter-VLAN Routing, VLAN, Trunking, Port Security, ACL (Access Control Lists), Basic Network Security
- Tools: Cisco Packet Tracer, Wireshark (basic)
- Web/Frontend: Next.js, React, Tailwind CSS
- Programming/Scripting: Python (Basic), SQL (Basic), C, C++, Bash
- Operating Systems: Windows, Linux

PROJECTS — DEVOPS

DevSecOps CI/CD Pipeline

Technologies: Jenkins, Docker, Kubernetes, SonarQube, Trivy

- Built an end-to-end DevSecOps pipeline integrating security scanning into CI/CD workflow
- Used SonarQube for static code quality analysis and Trivy for container vulnerability scanning
- Automated build, containerization, and deployment through a Jenkins pipeline
- GitHub: github.com/Amarchippawar21/devsecops-pipeline

Docker Containerization Projects

Technologies: Docker, Docker Compose, Nginx, Python, Node.js, MySQL

- Built and containerized multiple applications (Nginx, Python, Node.js, MySQL) using Docker
- Used Docker Compose to orchestrate and manage multi-container environments
- GitHub: github.com/Amarchippawar21/docker-projects

AWS Infrastructure Automation using Terraform

Technologies: Terraform, AWS (VPC, EC2, IAM, Security Groups, S3)

- Provisioned AWS resources (VPC, EC2, IAM, Security Groups, S3) using Terraform in a modular folder structure
- Implemented Infrastructure as Code (IaC) practices with reusable, version-controlled configuration
- GitHub: github.com/Amarchippawar21/aws-terraform-infrastructure

Linux Shell Scripting for System Administration

Technologies: Bash, Linux

- Developed Bash scripts for backup, disk/CPU/memory monitoring, user management, and service health checks
- Automated routine sysadmin tasks to improve operational efficiency
- GitHub: github.com/Amarchippawar21/linux-shell-scripting

DevOps Portfolio Website

Technologies: Next.js, React, Tailwind CSS, Framer Motion

- Designed and deployed a personal portfolio website showcasing DevOps, Cloud, Networking, and Automation projects
- Implemented GitHub integration, responsive UI, and a contact form using EmailJS

- Live: devops-portfolio-nextjs-umber.vercel.app | GitHub: github.com/Amarchippawar21/devops-portfolio-nextjs

PROJECTS — NETWORKING & CYBERSECURITY

Basic Network Design — Cisco Packet Tracer

Dec 2025 – Feb 2026

- Designed and implemented a basic LAN network; connected multiple PCs to a switch using Ethernet cables
- Configured router interface with static IP addressing; verified connectivity using ping between PCs
- GitHub: github.com/Amarchippawar21/basic-network-packet-tracer

Multi-Router Network with Static Routing and Server

Feb 2026 – Mar 2026

- Designed a multi-router network connecting two office networks using static routing
- Configured LAN/WAN interfaces and a server with HTTP service; connected multiple clients across networks
- Verified connectivity via ping and accessed server through a web browser

CERTIFICATIONS

- Data Analytics Essentials — Cisco Networking Academy
- Introduction to Cybersecurity — Cisco Networking Academy
- Junior Cybersecurity Analyst Career Path — Cisco Networking Academy
- Networking Basics — Cisco Networking Academy
- Networking Devices and Initial Configuration — Cisco Networking Academy
- Introduction to IoT — Cisco Networking Academy
- Google Cloud – Trust and Security

EDUCATION

Bachelor of Engineering (Electronics & Telecommunication)

Priyadarshini College of Engineering, Nagpur | Aug 2017 – Aug 2021 | CGPA: 9.18 (85.44%)

WORK EXPERIENCE

Teaching Assistant — Phoenix Academy, Wardha

Aug 2021 – Mar 2025

- Taught Mathematics and Reasoning, developing analytical and problem-solving skills
- Evaluated student performance using structured data and performance tracking
- Managed classroom activities and maintained discipline; improved communication and presentation skills

KEY STRENGTHS

- Strong analytical thinking and problem-solving ability
- Hands-on practical experience across DevOps and networking projects
- Quick learner, adaptable, and comfortable working in team environments
